The attached will give you a picture of our word processing holdings. Page 1 is Agency-wide; pages 2-6 cover each Directorate plus O/DCI. Of the 505 units, well over half (339) are IBM magnetic card typewriters--hardly state of the art. We are working with Logistics on an RFP for a standard family of word processors capable of eventual inter-connection with our computer network. In the meantime, all our acquisitions will be leased so we can move to the standard when it is selected.

As D/OL has told you, there are 74 separate contracts for word processor leases. In addition, there are 26 contracts for maintenance. Standardization will simplify the contract situation.

 Bruce Johnson
